“We strive for quality and craftsmanship in our work and expect the same from our suppliers. We find that Continental Cut Stone has that same desire. They consistently produce high quality material on time and at a reasonable cost.”

*Robert L. Fenimore, President
Fenimore-Blythe Masonry Contractors
Fort Worth, Texas*

Service and quality are the hallmarks of Continental Cut Stone, Florence, Texas. Founded in 1987, Continental Cut Stone has become the preferred choice among architects, builders, and contractors involved in limestone construction and restoration.

Continental has developed the unique reputation as a team player by putting customers first, solving problems quickly, and delivering quality product on time and within budget.

“We have been associated with Continental Cut Stone for ten years. Mr. Robert Teel and his company have always conducted themselves in a professional and ethical manner. I would highly recommend them to anyone.”

*James Roppolo, President
A-Tex Waterproofing, Inc.
Georgetown, Texas*

Finely cut limestone requires skilled craftsmen and a commitment to quality. At Continental Cut Stone, we value training and teamwork in the development of our employees. All employees are focused on the goals of our customers: quality products, prompt delivery, and the bottom line. We work as a team to achieve these goals every day.

The endurance of Limestone with its soft texture and colors distinguish it from other stones. The soft appearance is warm to the eye and invites the touch.

“Texas Carved Stone has relied on the exacting standards of quality and timely delivery of our dimensional stone from Continental Cut Stone for the past 15 years. They have never failed to exceed our expectations.”

*Bob Ragan & Mary Condon, Owners
Texas Carved Stone
Florence, Texas*

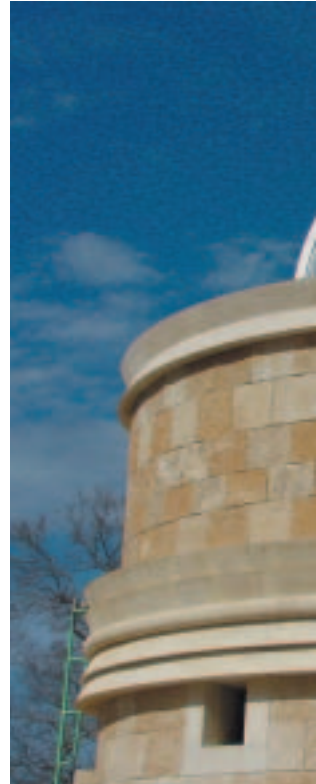

Contractors and builders alike are impressed with the service delivered by Continental Cut Stone. Finely crafted limestone is just the beginning. We realize our products are part of a complex project with time and financial constraints. Therefore, we keep our commitment to on-time delivery and stated cost figures.

“Continental Cut Stone is our preferred cut limestone supplier due to their commitment to quality and excellent service. We specialize in unique projects, and CCS has always welcomed the challenge of our work and performed very well. We have every confidence in their product and services.”

***David Escobedo, President
Escobedo Construction
Austin, Texas***

The tools of the trade range from precision chisels to heavy machinery. Continental has invested in the right machinery for the job that eliminates waste, increases precision, and expedites finished product. We are constantly looking for ways to save our customers time and money through purchases of the latest in limestone cutting technology.

“Many of our projects involve extremely complex details and design. Continental Cut Stone has been very helpful working out practical methods to achieve the desired result. We are impressed with CCS’ ability to utilize today’s sophisticated machinery while producing ‘old world’ style craftsmanship”

**Corey Ford, Vice-President
Tommy Ford Construction
Dallas, Texas**

Many of our customers approach us during the design stage because of our knowledge and expertise. We work closely with our customers to recommend design features that achieve the desired artistic goal while maximizing the benefits of limestone.

The Continental team includes an experienced management staff, draftspeople, and skilled operators dedicated to creating a masterpiece out of Native Texas or Indiana Limestone.

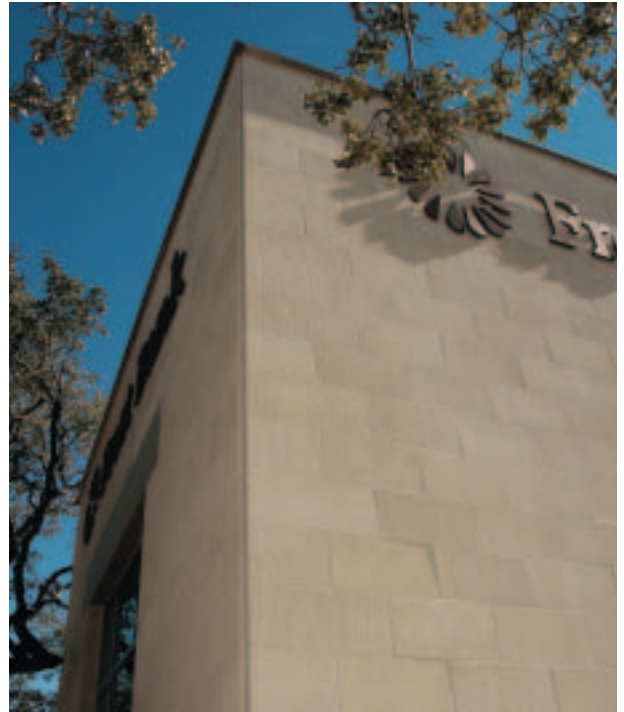

Our craftsmanship and pride in the finished product is apparent to our customers.

6501

Continental Cut Stone specializes in high-end residential projects. However, we have experience in commercial and restoration projects. We welcome the opportunity to assist with all your cut stone needs.

Continental Cut Stone provides interior architectural elements as well. We produce fireplace mantles, columns, balustrade, treads and risers and a collection of features cut to your design. We are a custom fabricator and will work to assist you with your next project, large or small.

Projects at Continental Cut Stone begin in our estimating department where we work to provide our customers a fair price and a time frame estimate. Upon acceptance of our proposal the drafting department will carefully develop shop drawings for your approval. Shop tickets are then produced from your shop drawings and sent to our production facility where your order will be produced to exacting specifications. Upon completion, your order can be shipped directly to your job site on one of our fleet of 18-wheel trucks.

Production of fine cut limestone starts with the selection of quality raw materials. We take the time to choose the right stone for the job from our own quarry. All of our employees take pride in being the supplier of choice for cut limestone construction.

Limestone is a product of nature and is subject to variations in color, texture and chemical content. Because of these characteristics, we cannot assure complete uniformity.
